

MEI, LLC honored with Sixth Consecutive “Supplier Excellence Award” from Analog Devices Inc.

Albany , OR– May 1, 2009

Analog Devices has presented semiconductor equipment manufacturer and service provider MEI LLC with its sixth consecutive “Supplier Excellence Award” in the Local Site Services category. The “Supplier Excellence Award” is Analog Device’s highest honor, and MEI is honored to have won the award for six consecutive years. Based on an exacting supplier-rating program, MEI was one of just 16 suppliers worldwide to receive the honor from ADI, the global leader in high-performance semiconductors for signal processing applications, chosen from among a supplier base of more than 2000 vendors. This award recognizes MEI for its consistent, outstanding performance and continuous improvement; strategic contribution to ADI’s technology and market leadership; anticipation and delivery of cost reduction initiatives; and exemplary commitment to manufacturing excellence.

“Receiving a Global Supplier Excellence Award from Analog is an honor particularly given the breadth of products and services we supply to this important customer. We know that in order to maintain this relationship and the level of business it accompanies, we have to re-earn Analog’s trust and loyalty each and every day and our employees are dedicated to that goal.” Said Dan Cappello, CEO of MEI LLC. Liam McCaffrey, Director of purchasing, Worldwide Manufacturing for Analog Devices noted, “MEI LLC is a consistent high performance supplier to ADI, providing multifaceted support as an equipment manufacturer and retrofitter together with providing technical support.”

"Receiving the Analog Devices Supplier Excellence Award for the sixth consecutive year is an honor, and caps off a great year of new products, new markets and productivity for MEI," said Cappello. "Our relationship with Analog Devices continues to evolve as their needs shift and expand. MEI’s capabilities are broad and deep. Our challenge is to constantly anticipate our customers’ needs given that the semiconductor manufacturing landscape is constantly changing”.

###

About MEI LLC

MEI is a diversified manufacturing and service company serving the semiconductor and high technology industries. The company’s specialties include automated and semi-automated wet process systems and services; chemical delivery systems, control automation software; industrial and process equipment moving, rigging and crating services; clean room safety, ergonomic and support equipment; as well as a variety of manufacturing services, including CNC machining, metal and plastic fabrication and powder coating. MEI has built its reputation upon a commitment to outstanding customer service since 1990. For more information about MEI, visit www.meillc.com.

About Analog Devices

Innovation, performance, and excellence are the cultural pillars on which Analog Devices has built one of the longest standing, highest growth companies within the technology sector. Acknowledged industry-wide as the world leader in data conversion and signal conditioning technology, Analog Devices serves over 60,000 customers, representing virtually all types of electronic equipment. Celebrating over 40 years as a leading global manufacturer of high-performance integrated circuits used in analog and digital signal processing applications, Analog Devices is headquartered in Norwood, Massachusetts. <http://www.analog.com>
